Product (Poster or Presentation) for a General Audience						
Appropriate title with group member names. [For presentation: we introduce each group member]	Not provided	Missing many details	Missing some details	Info provided but title could be improved	Info provided with well-formed title	
Introduction: We provide sufficient background for the data set. We clearly state the research objective or question of interest.	We did yet provide an adequate background & introduction to our study.	We have an Intro, but it is missing several key points, such as the research objective.	We have an Intro that includes all major points, but at least one of the points is unclear to the audience.	We provide a good Intro that includes the main points and is clear to the audience.	We have a well-developed Intro that not only is clear and includes the main points, but also captures the reader's interest in the study.	
Data & Methods: We provide a concise but clear explanation of data steps appropriate for an audience who may not understand R, including a citation of the data.	We did not yet include an explanation of data preparation.	We provide a basic description of some steps, but we are missing some key points.	We provide an explanation that mentions enough detail so that the reader knows the major steps taken.	We provide a good explanation that describes the key steps, but some minor areas should be improved.	We provide a good, concise explanation of data wrangling that the audience understands what we did.	
Descriptive Statistics: We present appropriate descriptive statistics in a well-formatted table.	We have yet to provide descriptive statistics.	We present descriptive statistics but as default R output, or we do not have a table	We present basic output in a table with some issues in formatting.	We present appropriate output with minor issues in formatting.	We present well formatted and appropriate output.	
Data Visualization (Graph 1): We create an appropriate, visually appealing, & informative graph that supports the report.	We have yet to provide an appropriate graph.	We provide a basic graph, but it lacks major components or is not appropriate.	We provide a basic graph that fits the report, but it needs more features added.	We provide a good graph that is appropriate for the report.	We provide a visually appealing, informative graph that uses multiple ggplot2 features.	
Data Visualization (Graph 2): We create an appropriate, visually appealing, & informative graph that supports the report.	We have yet to provide an appropriate graph.	We provide a basic graph, but it lacks major components or is not appropriate.	We provide a basic graph that fits the report, but it needs more features added.	We provide a good graph that is appropriate for the report.	We provide a visually appealing, informative graph that uses multiple ggplot2 features.

Discussion: We provide appropriate, thoughtful discussion that summarize our results and state takeaways. Limitations and new questions are included as appropriate.	We have yet to provide an appropriate discussion of results or takeaways.	We provide a discussion, but it is missing several key points.	We provide a discussion that includes all major points, but at least one point is unclear to the audience.	We provide a good discussion that includes the main points and is clear, but it lacks new questions and limitations.	We provide an appropriate, thoughtful discussion that includes limitations or new questions.	
References: All references are listed and formatted properly.	We have yet to provide references	We provide references, but don't have enough references	We provide references, but some details should be improved	We provide a complete References, but the formatting could be improved	We provide a complete References section with properly formatted entries	
Overall Writing: Our product is written well and free of spelling, grammar, and other wording mistakes or issues. We communicate ideas to the audience clearly and at the appropriate level.	We have yet to clearly communicate our ideas to the audience, or our work is not of college-level quality.	Our work contains major and minor errors. Several sections are unclear to the audience. The product does not flow smoothly.	Our product contains infrequent major errors or frequent minor errors. Some ideas aren't communicated clearly.	Our product is well-written with only minor errors. Ideas are generally communicated well, but some sections could be improved.	Our product is well-written, with smooth transitions between sections and very limited spelling and grammar mistakes. Ideas are communicated clearly.

R Markdown Report for a Technical Audience						
Title and Summary: We provide an appropriate title with group member names in addition to a short statement of purpose.	We did not yet provide a title, names, or short statement.	We provide one of the three items, but not the other two.	We provide two of the three items, but not the other two.	We provide all three elements, but at least one has a minor issue.	We provide an appropriate title, group member names, and clear but concise statement of purpose.	
Data & Methods: We do appropriate and thorough data wrangling for the question of interest. We provide text that explains how we demonstrate proficiency.	We did not yet perform any meaningful data wrangling nor provide text.	We perform some basic data wrangling, but not all steps are appropriate. Explanation is at best limited.	We perform basic data wrangling that is appropriate for the data. Our explanation provide basic details, but lacks depth.	We perform thorough data wrangling tasks that are appropriate for the data. We provide text that illustrates our proficiency.	We provide thorough, appropriate data wrangling that exceed general project expectations. Our explanation clearly illustrates our proficiency in data wrangling.	
Descriptive Statistics: We include appropriate descriptive statistics to summarize the data with a well-formatted table using something like the kableExtra package. We provide text that explains how we demonstrate proficiency.	We have yet to perform any meaningful descriptive statistics nor provide text.	We perform some basic summaries, but not all are appropriate for the data, or no table was made. Explanation is at best limited.	We perform basic summaries that are appropriate with minor issues, or the table is not formatted well. Our explanation provide basic details, but lacks depth.	We provide sufficient, basic summaries with minimal issues, including formatting. We provide text that illustrates our proficiency.	We provide summaries that are appropriate for the data and have a well-formatted table. Our explanation clearly illustrates our proficiency in create data summaries and generating tables.	
Data Visualization: We create at least two unique, appropriate, visually appealing, & informative graphs. We provide text that explains how we demonstrate proficiency.	We have yet to provide two appropriate graphs nor provide text.	We provide basic graphs, but they lacks major components or are not appropriate. Explanation is at best limited.	We provide basic graphs, but they need more features added. Our explanation provide basic details, but lacks depth.	We provide two good graphs that are appropriate for the report. We provide text that illustrates our proficiency.	We provide two unique, visually appealing, informative graphs that use multiple ggplot2 features. Our explanation clearly illustrates our proficiency in data visualization.

Member contributions: We provide a brief explanation of each group member's contributions to the project.	We have yet to provide member contributions.	We provide some contributions, but don't have enough details.	We provide basic contributions, but some details should be improved.	We provide complete contributions with minor issues.	We provide a complete contributions section.	
Code and reproducibility: Our Rmarkdown file runs with no errors and fully reproduces all results from both products.	We have yet to provide all R code that was used for the project.	Our R code is provided but generates at least one error.	We provide R code that runs, but it does not reproduce all our results.	We provide R code that reproduces our results, but some details are missing or could be improved.	We provide R code that reproduces our results with appropriate comments throughout.
